Year 1 – Science

NC Unit: Everyday Materials

What are things made from?

Chemistry

What should I already know?

- Objects feel and look different based on the material they are made from.
- Use different materials when painting and making art.

Big ideas this works towards:

- All matter (stuff) in the universe is made up of tiny building blocks.
- The arrangement, movement and type of the building blocks of matter and the forces that hold them together or push them apart explain all the properties of matter (e.g. hot/cold, soft/hard, light/heavy)

	soft/nara, ugnt/neavy)	
What will I know by the end of the unit?		
-	things that you can touch or see. made from materials.	
Which materials are some objects made from?	glass metal rock plastic wood water brick paper fabrics elastic foil	
Words that I can use to describe materials.	transparent waterproof opaque stiff soft shiny rough absorbent bright bendy stretchy hard smooth dull	
Which materials are natural and which are man- made??	 Some materials are natural while others are man made. Natural materials are materials which are found in nature. Man-made materials are materials which have been produced by humans. 	
Man-made_Materials Natural Materials		
concrete glas	ss paper rubber chalk sand oil leather iron allostic polyester gold cotton coal wood	

Vocabulary			
absorbent	material that soaks up liquid easily		
bendy	an object that bends easily into a curved shape		
brick	rectangular blocks of baked clay used for building walls, which are usually red or brown		
dull	a colour or light that is not bright		
elastic	a rubber material that stretches when you pull it and returns to its original size and shape when you let it go		
fabrics	cloth or other material produced by weaving together cotton, wool or other threads.		
foil	sheets of metal as thin as paper		
glass	a hard transparent material		
man-made	things are created by people		
metal	a hard substance such as iron, steel, gold, or lead		
natural	things that exist in nature and are not made by people		
opaque	if an object or substance is opaque , you cannot see through it		
plastic	a material which is light in weight and does not break easily		
rock	the hard substance which the Earth is made of		
rough	uneven and not smooth		
shiny	things are bright and reflect light		
smooth	no roughness, lumps, or holes		
soft	not rough or hard		
stiff	firm or does not bend easily		
stretchy	slightly elastic		
transparent	If an object is transparent , you can see through it		
waterproof	does not let water pass through it		
wood	the material which forms the trunks and branches of trees
