

Year 2- Land Art

BIG Question: How does changing the composition impact on the art piece

Key Concept: Artists make deliberate choices when thinking about composition.

Key knowledge

Andy Goldsworthy is a British artist, known for his sculptures and photography. He is an environmentalist, which is someone who wants to protect the environment around them.

Which natural materials can you think of that he could use to make sculptures?

- leaves
- twigs
- pebbles
- rocks
- ice
- flowers
- grass
- pine cones

Did You Know?

Andy has even used human hair and cow dung in his work!

In this unit, children will explore how altering the composition impacts on the final piece. Children will scavenge for objects to create their natural artworks and then try to create something new using the same items.

What things can you create from natural materials at home? We would love you to share them on See-saw.

Key Vocabulary

Definition

composition

the arrangement of elements within a work of art

photography

creating images with photos

land art

art made directly in the landscape using natural materials

natural materials

materials found in nature- not man made

sculpture

3D art
