

Computing (Information Technology) – Year 4

How are films made?

Big Idea:

Videos, writing and pictures can be added into apps and edited once in them to create videos.

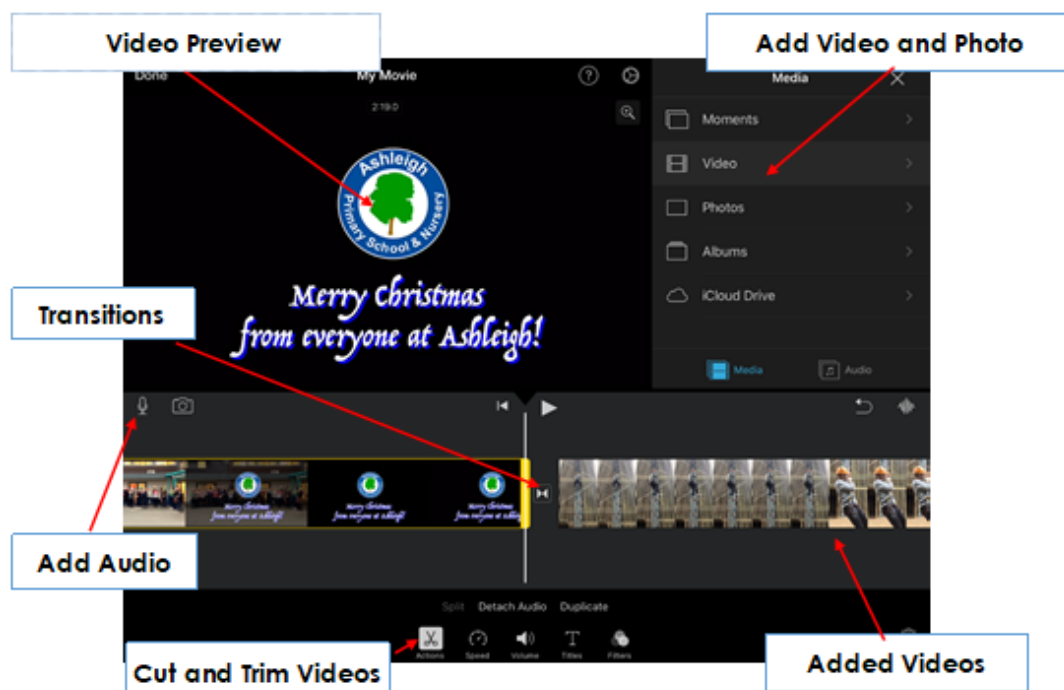

What should I already know?

- How search engines work, how to use them and take information from them safely.
- What keyword searching is and how to select keywords to produce the best search results.
- What an E-Book is and how it can be used to present information.

What will I know by the end of this unit?

- How to add video and voice recordings onto an app.
- How to cut and trim videos.

iMovie:

Key vocabulary:

Video	The recording and showing of moving images with sound.
Trailer	A series of short pieces of video taken from a longer video.
Cut	The process of putting more than one video together to form a longer video.
Trim	The process of removing parts of a video.
Transition	The way in which a digital image/video moves from one section to another.
Voiceover	Words spoken over the top of a video, normally added after the video has been taken.
