

What should I know already?

- Animals can be grouped into **vertebrates** (and further into fish, reptiles, amphibians, birds and mammals).
- Some examples of **life cycles** (including those plants and humans)
- **Reproduction** and **growth** are two of seven **life processes**.
- How to live a healthy lifestyle.

Big Ideas this works towards.

- Living things are special collections of matter that make copies of themselves, use energy and grow.

Vocabulary

adolescence	the period of your life in which you develop from being a child into being an adult
adulthood	the state of being an adult
development	the gradual growth or formation of something
foetus	an animal or human being in its later stages of development before it is born
genitals	the reproductive organs

rapid	A rapid change is one that happens very quickly
reproduction	when an animal or plant produces one or more individuals similar to itself
toddler	a young child who has only just learned to walk
vertebrate	a creature which has a spine

What will I know by the end of the unit?

What are the main stages of the human life cycle ?	<p>foetus - an unborn animal or human being in the very early stages of development</p> <p>newborn - this is a baby that has just been born.</p> <p>infancy - this is a period of rapid change. Many toddlers learn to walk and talk at this stage.</p> <p>childhood - children learn new things as they grow. They become more independent.</p> <p>adolescence - this is when the body starts to change and prepare itself for adulthood. Hormonal changes take place over a few years. This is also known as puberty.</p> <p>early adulthood - this is when humans are usually at their fittest and strongest.</p> <p>middle adulthood - changes such as hair loss may happen. There are also some hormonal changes again and the ability to reproduce decreases.</p> <p>late adulthood - there is a decline in fitness and strength.</p>
What is puberty ?	<ul style="list-style-type: none"> • Puberty is the change that happens in late childhood and adolescence where the body starts to change because of hormones. • Some changes include growth in height, more sweat, hair growth on arms and legs, under the armpits and on genitals, and growth in parts of the body such as male genitals and breasts. • Females begin to menstruate.
